

Creating a New Tile Line

Verify you are in **SVY** mode

1 → **Start** at the **High Point** of the **run** with the **plow raised up**

2 → Press  →  and **Drive** to **Low Point** (outlet) of the **run**

3 → Press  →  and **lower** the **plow** to starting grade

4 → Press  →  to **design** the **run**

Verify the menu bar looks like this

5 → **Toggle** **Machine Control** on your tractor and **lay** the **run**

6 → Press  →  when **done** to **start** a new **run**

Constant Slope Tile Line

1 → *Drive* to where you want the **tile line** and **lower** the **plow** to **grade**

2 → *Press* and *hold*  to open the *Pass Menu*

3 → *Select*  ← *LAY MIN (Lay pass with minimum slope)*

4 → *Press*  →  to **set the grade**

5 → *Toggle* **Machine Control** on your tractor and **lay the tile**

Adjust the **slope** with the **min slope buttons** 

6 → *Press*  to **start a different tile line**
